DETAILED ACTION

This action is in response to the application filed on 14 January 2002 in which claims 1-10 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 9-10 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The “means for defining” the different curves critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The specification fails to teach what specific component/element is used to define the different curves. As best understood from the specification, the examiner has included claims 9-10 in the rejection below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Levy et al (U.S. Patent No. 2,690,231).

Art Unit: 2643

Regarding claim 1, Levy discloses an acoustic waveguide comprising: first and second curves (12, 14); third and fourth curves (12b, 14b); and a continuous three-dimensional least energy surface coincident with the first, second, third, and fourth curves that intersect a circular throat (11, 15) and a non-elliptical closed control curve that defines a mouth (17).

Regarding claim 2, Levy discloses the continuous three-dimensional least energy surface is free of discontinuities (see figures 1-3).

Regarding claim 3, Levy discloses the continuous three-dimensional surface further includes: a minimum surface area axial section place (near 11,15) of the continuous three-dimensional surface formed from the first, second, third, and fourth curves.

Regarding claim 4, see the rejection of claim 3.

Regarding claim 5, Levy discloses the first and second control curves (12, 14) are symmetrical about an axis.

Regarding claim 6, Levy discloses the third and fourth control curves (12b, 14b) are symmetrical about the axis.

Regarding claim 7, see the rejection of claim 1.

Regarding claim 8, see the rejection of claim 2.

Regarding claims 9-10, see the rejection of claims 7-8..
